

\$1.3 billion energy storage project

Overview

Why do we need a large energy storage system?

Record-breaking deployments of wind and solar in the U.S. are creating a need for large, long-duration energy storage so that they can perform like baseload resources and compete with traditional fossil fuels, Chapin said. Projects over 1 GWh now represent \$8.7 billion — or two-thirds — of the company's total pipeline.

How much is trsdc's battery energy storage system worth?

TRSDC secured financial close on its own debt facilities for the project, totalling US\$3.76 billion, last month. Huawei will supply the battery energy storage system (BESS), as reported by Energy-storage.news. Reported figures on its capacity vary between 1,200 MWh and 1,300 MWh, with either figure by far the largest off-grid BESS in the world.

Who has secured the US\$1.302 billion senior debt facility?

Developers ACWA Power, SPIC Huanghe Hydropower Development Company and Saudi Tabreed Cooling Company have secured the US\$1.302 billion senior debt facilities, ACWA announced last week (24 February).
