

# 13 series 8 parallel lithium battery pack

# **Overview**

What are the different types of lithium battery packs?

Lithium battery series and parallel: There are both parallel and series combinations in the middle of the battery pack, which increases the voltage and increases the capacity. Such as 4000mAh, 6000mAh, 8000mAh, 5Ah, 10Ah, 20Ah, 30Ah, 50Ah, 100Ah and so on. Take 48V 20Ah lithium battery pack as an example Lithium Battery PACK.

What are the advantages of lithium batteries in parallel?

Lithium batteries in parallel: the voltage remains the same, the capacity is added, the internal resistance is reduced, and the power supply time is extended. Lithium battery series and parallel: There are both parallel and series combinations in the middle of the battery pack, which increases the voltage and increases the capacity.

What is the difference between lithium battery in series and parallel?

Lithium battery in series: the voltage is added, the capacity remains the same, and the internal resistance increases. Lithium batteries in parallel: the voltage remains the same, the capacity is added, the internal resistance is reduced, and the power supply time is extended.

Can you put lithium batteries in parallel without protection?

@Tagadac You said not to put lithium batteries in parallel without any protection. My question described a scenario where three sets of 'four 18650s connected in parallel' are connected in series.

# 13 series 8 parallel lithium battery pack

# <u>Series and Parallel Configuration of Lithium</u> <u>Battery</u>

Four 18650 Lithium-ion cells of 3400 mAh can connect in series and parallel as shown to get 7.2 V nominal and 12.58 Wh. The slim cell allows ...
