

1900kw container power generation

Overview

What is a 40 ft containerized generator set?

Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for easy transportation, simple installation and are stackable, offering up to 34% space utilization savings over traditional build designs.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

Why is Caterpillar xgc1900 a good rental generator?

In addition to improved fuel efficiency, the next generation XGC1900 rental generator provides significant power density advantages. Caterpillar developed new exhaust stacks that reduce spacing requirements for sites

requiring multiple units. Without aftertreatment - Meets some of the most stringent codes worldwide.

What is the standard ventilation for genset containers?

The standard ventilation is designed for ambient temperatures from -25°C to +40°C. The genset containers can be equipped with several additional features to enable operation at lower temperatures on request. Type 6 containers are available with a similarly broad range of options that we offer for the Type 2 / 3 / 4 containers.

1900kw container power generation

XGC1900 50/60Hz

With a robust, rental-ready construction, the 1900 kW (2375 kVA) XQC1900 generator is designed to be easily transported around project sites safely and efficiently. In addition to improved fuel ...
