

48V Water Pump Inverter Solar

Overview

What is a 48 volt solar water pump?

48 volt solar water pump for sale, with maximum head 56~95m (180~310ft), maximum flow 925~1585 gallons per hour, single-suction impeller, 3 inch inlet diameter and 1.25 inch outlet diameter. 1hp solar powered submersible pump can be used for irrigation, water tank, pool, livestock or farms.

How to choose a solar pump inverter?

Understand the rated power of the water pump. Normally, the rated power of the solar pump inverter should be slightly more than or equal to the rated power of the water pump to ensure that the pump can be operated normally. For instance, if the water pump's rated power is 2kW, the selected inverter should have a rated power of 2kW or higher.

Can a solar inverter drive a water pump?

Let's explore them. Three solar inverters can drive a water pump and convert photovoltaic direct current into alternating current. It is an inverter designed for running water pumps using solar power. It directly transforms the direct power produced by solar panels into an alternating current to drive the pump.

What is a solar pump inverter?

The solar pump inverter is an off-grid inverter that doesn't rely on the grid and operates independently of the load. The traditional off-grid inverter requires a battery, which costs about 30% of the system's cost. The system has a life span of only 3-5 years, which can affect your ROI.

What is a DC controller for a solar water pump?

The special DC controller can show power, voltage, current and speed values in real time. Max. Flow & Max. Head * 750W solar water pump with DC controller, 48V working voltage, 925~1585 gph max. flow, 56~95m max. head.

How a solar water pump works?

[Intelligent Water Shortage Sensers]: This solar water pump has an intelligent water shortage sensor, so it has an intelligent water shortage protection function. When there is no water in the well, the pump will automatically stop working. [Pump Motor]:The solar pump use NSK bearing with permanent magnet brushless synchronous motor.

48V Water Pump Inverter Solar

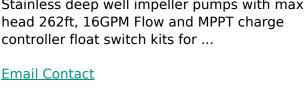

What Kind Of Solar Inverters Can Drive a Water Pump?

Multiple types of inverter can drive a water pump. Let's explore them. Three solar inverters can drive a water pump and convert photovoltaic direct current into alternating ...
