

## A black rectangular LiFePO4 battery with a handle and terminals. The battery is shown from a three-quarter perspective, highlighting its sturdy construction and the integrated handle on the right side. The top surface features two terminals, one red and one black, for electrical connection. The front face of the battery is labeled with technical specifications and safety information.

## Overview

---

The 5KW/5kwh mobile energy storage trolley integrates energy storage batteries and hybrid inverters, which is equivalent to a small mobile power station; as a distributed energy storage power source, it can be used for emergency charging of new energy vehicles or for various small and medium-sized vehicles anytime and anywhere. Electrical equipment provides power applied to emergency power supply, outdoor work, mobile car repairing, weak power supply system and monitor power supply system.
