Overview

Will lithium demand increase in Afghanistan?

Most researchers agree that lithium demand will only increase. Afghanistan's estimated reserves put it among global leaders — if the metal can be extracted. With the Taliban capturing Kabul on the August 15, Afghanistan is predicted to soon lose most of its Western investors.

How much is Afghanistan's mineral deposit worth?

In 2010, US military officials and geologists revealed the extent of Afghanistan's mineral deposits, valued at between \$1 trillion and \$3 trillion. But since the recapture of Kabul by the Taliban, it's unlikely the West will be invited to trade talks anytime soon.

Is Afghanistan rich in Mineral Resources?

While being one of the world's poorest countries that has been at constant war for almost half a century, Afghanistan, at the same time, is a nation that is extremely rich in mineral resources.
