

Albania large-scale energy storage project construction

Overview

PS Moglice Extension comprises the construction of an underground powerhouse, tunnels, dam, and an upper reservoir of approx. 25 million m 3, while utilizing the existing Moglice HPP Reservoir as the lower one. What is the total capacity of the solar projects in Albania?

There are currently at least 13 solar projects in the pipeline with a capacity of 1.24 GW between them. In addition, a recent wind farm proposal has been given strategic investment status in the country. But asides from controversial gas from controversial countries, Albania is also looking at wind and solar power.

What is Albania's energy sector strategy?

In 2018, Albania adopted its National Energy Sector Strategy, which examined various energy development scenarios and set forth a series of key indicators and objectives that will shape Albanian's energy sector over the period from 2018 to 2030 (Table 2). Most notably, the strategy stipulated a 42% share of renewable energy in the TPES by 2030.

Will Albania build its first lithium ion battery plant?

Chief Executive Officer Bruno Papaj said the firm signed a memorandum of understanding with an Indian investor on the construction of Albania's first lithium ion battery plant. The facility is planned to come online within two years, with 100 MW in annual capacity.

Does Albania have a hydropower plant?

Hydropower makes up almost the entire domestic output in Albania, which helps balancing to a point, but it has no pumped storage hydropower plants. Furthermore, the country is exposed to drought and often turns to emergency imports.
