

# Algeria integrated energy storage power station

#### **Overview**

The Hassi R'Mel integrated solar combined cycle power station is an (ISCC) near in . The plant combines a 25 array, covering an area of over 180,000 m, in conjunction with a 130 MW plant, so cutting compared to a traditional power station. The output from the solar array is used in the steam turbine.

When will Algeria's solar power plant be completed?

With completion expected by late-2025 or early-2026, the plant is set to support Algeria's energy grid with a capacity of 362 MW. In the same month, China State Construction Engineering Corporation began construction of a 300 MW solar power plant in Ouargla Province, as well as a 200 MW solar power plant in El M'Ghair.

How many solar power plants are there in Algeria?

Approximately 60 solar power plants are planned to be constructed in Algeria within the next ten years. Algeria is also part of the Desertec Industrial Initiative, which intends to use Sahara solar and wind power to provide 15 per cent of Europe's electricity needs by 2050.

How will astroenergy n-type solar modules support Algeria's high-level expansion strategy?

To support these developments, the consortium has supplied Astroenergy ntype TOPCon solar modules, integrating advanced technology into Algeria's high-level expansion strategy. In March 2024, Turkish firm Özgün İnşaat launched construction of the Hassi Delaa Solar Power Plant in Laghouat.

How is Algeria diversifying its energy sector?

Algeria is progressing with its strategy to diversify its energy sector, with a focus on a balanced mix of renewable energy, green hydrogen and traditional oil and gas development.

What is Hassi R'Mel integrated solar combined cycle power station?

The Hassi R'Mel integrated solar combined cycle power station is an

integrated solar combined cycle (ISCC) power station near Hassi R'Mel in Algeria.

What is the energy mix in Algeria?

In 2010, Algeria's energy mix was almost exclusively based on fossil fuels, especially natural gas (93%). However, Algeria has enormous renewable energy potential, mainly solar, which the government is trying to harness by launching an ambitious Renewable Energy and Energy Efficiency Program.

#### Algeria integrated energy storage power station

# Hassi R'Mel integrated solar combined cycle power station

The Hassi R'Mel integrated solar combined cycle power station is an integrated solar combined cycle (ISCC) power station near Hassi R'Mel in Algeria. The plant combines a 25 MW parabolic trough concentrating solar power array, covering an area of over 180,000 m, in conjunction with a 130 MW combined cycle gas turbine plant, so cutting carbon emissions compared to a traditional power station. The output from the solar array is used in the steam turbine.
