

Antarctica Communication Base Station Inverter

Overview

Several bases used their transceivers also to provide amateur radio worldwide communications on HF or amateur radio satellites with specific club callsigns, also useful on utility and emergency communications. Overview Telecommunications in Antarctica is provided by the organizations that have established research stations on the.

- Telephones – main lines in use: 0 (note: information for US bases only, 2001)
- Telephones – mobile cellular: Argentine bases have GSM networks provided by Argentinean carriers Claro and Movistar; system.

Television broadcast stations American Forces Antarctic Network at McMurdo Station, US; cable system with six channels (note: information for US bases only, 2002) Television channels several hundred at McMurdo S.

Internet Service Providers (ISPs): Argentine bases have WiFi provided by Argentinean internet provider , a fiber cable on polar plateau which was installed in 2009.
