

Are solar photovoltaic panels reliable in Timor-Leste

Overview

What is a photovoltaic project in Timor-Leste?

Just as the remaining renewable energies sources that are being explored by the Government in Timor-Leste, the photovoltaic units (or solar project) implementation project is specially directed for the families that live in remote areas, where difficulties still exist in the national energy network installation.

Does Timor-Leste have access to energy?

Access to energy remains a concerning challenge for many in Timor-Leste. The centralised nature of the local electricity supply chain has traditionally kept consumers reliant on the national grid to overcome chronic energy shortages.

Is a solar-powered Grid a good idea in Timor-Leste?

With the new UN reforms, the United Nations in Timor-Leste, under the leadership of the Resident Coordinator has now started lighting the way with its solar-powered grid which has begun to give maximum dividends. A powerful 300 kWp photovoltaic system is producing 400,000 kWh of clean electricity annually, filling critical gaps in energy supply.

Can a solar energy system help Timor-Leste achieve the 2030 Agenda?

"In Timor-Leste, our road to the 2030 Agenda for Sustainable Development starts at home. Our solar energy system can be a model for other UN Country Offices to show how we can jointly, sustainably and effectively tackle greenhouse emissions while reducing operational costs and scale up support across the United Nations System.

Could Timor-Leste be a cost-efficient alternative energy solution?

The Operations Management Team started weighing the feasibility and working on a cost-efficient alternative energy solution in 2016-2017 when Timor-Leste was facing high electricity costs and increased CO2 emissions. "In

Timor-Leste, our road to the 2030 Agenda for Sustainable Development starts at home.

How long do solar panels last?

The solar panels have a 25 year duration. The Government's main objective is that the communities become energy self-sufficient. "And in a few years the reverse may happen: the National network may buy energy from these small renewable energy sources, spread throughout the country", concluded the Secretary of State, Avelino Coelho.
