

# **Argentina energy storage project fees**

## Overview

---

Administered by CAMMESA, the tender offers \$10 per MW for supplied electricity, with storage bids capped at \$15,000 per MW monthly. Contracts will run for up to 15 years from authorization or until January 1, 2027. Can battery energy storage modernize Argentina's grid?

Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico) confirming the submission of 27 project proposals from 15 companies under its AlmaGBA program.

Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.

Will Argentina integrate new electricity storage infrastructure into urban distribution networks?

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

What is the Buenos Aires grid program?

Intended to strengthen the grid in the greater Buenos Aires region, the program has attracted a lot of attention; it has been subscribed to projects that are about twice the desired capacity.
