

Armenia Fair Energy Storage Power Station

Overview

What is Armenia's Energy Policy?

Diversifying energy sources and reducing import dependencies are key Armenian policy priorities. With no significant domestic fossil fuel reserves, hydroelectric power is the primary local energy source. Yerevan aims to expand renewables to meet decarbonization targets and decrease import reliance.

Is Armenia developing a battery storage project?

Currently, Armenia is in the initial stages of developing a pilot project on battery storage, with plans for a utility-scale project with an estimated installed storage capacity of 1,200 MWh to be tendered in the coming years.

Can Armenia reduce its reliance on energy imports?

Additionally, a second gas pipeline from Iran provides another import route, primarily utilized through a barter agreement where Armenia exchanges electricity for natural gas, only partially using the imported volumes for domestic consumption. Presently, Armenia is actively seeking ways to diminish its reliance on energy imports.

How much electricity is generated by solar power plants in Armenia?

The total amount of electricity generated by autonomous solar installations and solar power plants is estimated at 523.5 million kWh. This indicator is about 1.8 times higher than those in 2021. The Government of Armenia is implementing a promoting policy for the development of solar water heating technologies.

How many wind power plants are there in Armenia?

Three wind power plants (WPP) operated in Armenia in 2022. Total supply of the useful electricity from the WPPs was 1.7 million kWh in 2022. Armenia has significant potential for solar energy production. Solar energy is represented

by solar water heating and PV power plants.

Does Armenia have a gird stability?

Although Armenia's energy program for 2022-2030 includes plans to evaluate wind energy potential, tangible projects not yet on the pipeline, and the installed wind capacity remains negligible at 8.2 MW. As solar capacity continues to rapidly expand in the country, concerns regarding gird stability have commenced to rise.
