

# Armenia photovoltaic off-grid power system

# **Overview**

is widely available in due to its geographical position and is considered a developing industry. In 2022 less than 2% of was generated by . The use of solar energy in Armenia is gradually increasing. In 2019, the announced plans to assist Armenia towards developing its so.

Armenia's geography provides an ideal setting for solar power generation, with over 2,500 hours of sunshine annually. Recognizing this potential, the government introduced policies and subsidies to encourage the construction of solar farms and the adoption of rooftop solar systems.
