

Australia energy storage photovoltaic power station

Overview

What drives the growth of battery energy storage systems in Australia?

According to Wood Mackenzie's APAC Power & Renewables team, as reported in Forbes, one key factor driving the growth of battery energy storage systems (BESS) in Australia is its status as one of the most favorable markets for such systems.

Why is Australia embracing solar energy storage solutions?

To support this new solar-driven energy mix, Australia has successfully embraced energy storage solutions to balance the fluctuations in solar energy generation, paving the way for a more reliable and sustainable energy future.

How big is Australia's rooftop solar capacity?

According to the Clean Energy Council's bi-annual Rooftop Solar and Storage Report for the first half of 2024, Australia has achieved a cumulative rooftop solar capacity of around 24.4 GW, putting it on course to surpass the 25 GW mark by the year's end.

Is home battery energy storage a good idea in Australia?

Despite ongoing efforts, home battery energy storage adoption in Australia lags behind the growth necessary to meet the Australian Energy Market Operator's 2024 Integrated System Plan and the country's goal of 82 percent renewable energy by 2030.

Is Australia a leader in solar energy adoption?

Australia serves as a prime example, with its high rooftop solar adoption followed by a pioneering energy storage initiative that sets the standard for others to follow. In recent years, Australia has seen exponential growth in solar energy adoption, particularly in rooftop solar, where it stands as a global leader in terms of penetration.

How has battery storage impacted Australia?

In addition to home battery growth, significant investments in large-scale battery storage have led to a sharp increase in storage capacity across Australia. According to the Clean Energy Council, 2023 was a record year for large-scale battery storage, with 27 projects under construction by year's end, up from 19 in 2022.

Australia energy storage photovoltaic power station

<u>Iberdrola Australia breaks ground on 376MW solar ...</u>

Iberdrola Australia, a sub-division of utility Iberdrola, has commenced construction of a 376MW solar-plus-storage project in Queensland.
