

# **Australian New Energy Company Energy Storage**

#### **Overview**

How will Australia's energy storage capacity grow in 2024?

24 December, 2024 Australia's current 3 gigawatts (GW) of energy storage capacity will grow by up at least a third (1 GW) following the creation of a new battery and solar investment platform by ZEN Energy and HDRE, a \$1.3bn Taiwan-listed renewable energy company.

When will battery energy storage systems be available in Australia?

The construction of the grid was anticipated to begin in early 2022 and is expected to be in operation by 2023. Thus, upcoming projects in Australia are expected to boost the demand for battery energy storage systems (BESS) during the forecast period.

How many energy storage batteries are there in Australia?

According to the Clean Energy Council, in 2021, 34,731 energy storage batteries with a combined capacity of 347 MWh were installed in Australia, witnessing a growth of 45.7% compared to 2020.

What is the energy storage industry?

Energy Storage forms part of the Energy industry, which is the 15th most popular industry and market group. If you're interested in the Energy market, also check out the top Energy & Cleantech, Renewable Energy, Recycling, Oil & Gas or Energy Efficiency companies. Advanced energy storage solutions.

Which private developers are deploying a new battery energy storage capacity?

Alongside Neoen, other private developers have deployed a further 1.1 GW of battery energy storage capacity. This is led by Eku Energy (through its two joint ventures with Shell and Engie), Edify Energy, and Vena Energy. Private developers account for three-quarters of BESS capacity operational today.

What percentage of Australian electricity is renewable?

As of 2021, renewable energy sources accounted for 10.3% of Australian energy consumption. In 2021, Australia's renewable electricity generation was about 61.3 TWh, 22.84% higher than the entire renewable electricity generation in 2020.
