

Base station communication facilities of the Ministry of Environmental Protection

Overview

What is a communication base station?

Communication base station setups will usually include a wide array of different technologies, including power supplies, data servers, head end, radio repeaters, and communication systems that allow for high-speed continuous information flow. It can also be used as part of a leaky feeder system in the communication network.

Do 5G application base stations meet the electromagnetic radiation environment control limits?

According to the analysis of the monitoring data, the electromagnetic radiation environment levels of 5G application base stations at various monitoring points in urban areas all meet the requirements of the Electromagnetic Environment Control Limits (GB8702-2014).

Can 5G application base stations avoid pollution before treatment?

To understand the current situation of the electromagnetic radiation environment of 5G application base stations is the basis for avoiding the old road of “pollution before treatment” in environmental management and solving the problem of neighbourhood avoidance.

[Email Contact](#)

 **Efficient
Higher Revenue**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 1000V
- 100% Peak Output Power
- 2 MPPT Trackers, 100% DC Input Utilization
- Max. PV Input Current 10A, Compatible with High Power Modules

 **Intelligent
Simple O&M**

- IP65 Protection Degree: support outdoor installation
- Smart 11 V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

 **Flexible
Abundant Configuration**

- Plug & Play, EPT Switching under 10ms
- Compatible with Lead acid and Lithium Batteries
- Max. 6 units Inverter Parallel
- AGC Function (Optional): when an arc fault is detected the inverter immediately stops operation
