Overview

How do you replace a battery in a base station?

To replace batteries in a SimpliSafe base station, rotate the base counterclockwise (CCW) to remove it, then remove the batteries and replace them while ensuring the (-) and (+) orientation. When disposing of NiMH batteries, they should be recycled.

What type of batteries does the base station use?

Your SimpliSafe Base Station is fitted with NiMH rechargeable batteries, which are constantly recharging as long as the Base Station is plugged in. The base station model is SSBS3.

What batteries do I need to replace my SimpliSafe base station?

To replace the batteries in your SimpliSafe base station, you need QTY (4) AA nickel-metal hydride (NiMH) rechargeable batteries. Do not use Alkaline or any other non-NiMH batteries. The batteries supplied from SimpliSafe are rated at 1000mAh capacity (very low).

How to replace a lithium ion battery?

Ensure that the replacement Lithium-ion battery has compatible voltage, capacity, and physical dimensions. Step 2: Gather the Required Tools To perform the replacement, you will need the following tools: Step 3: Prepare a Safe Workspace Create a safe and well-ventilated workspace for the Lithium-ion battery replacement.

Can you put alkaline batteries in a base station?

NEVER insert regular alkaline batteries into the Base Station as they may damage the device. Plug your Base Station back into power. Was this helpful?

Does your Keypad look like the one pictured to the left?

How do you remove a NiMH battery from a base station?

Remove the power plug from the bottom of the base station to expose one screw. Remove the screw, rotate the base counterclockwise, and it will pull off. Remove the NiMH batteries and replace them while ensuring the correct (-) and (+) orientation. When disposing of NiMH batteries, they should be recycled.
