

Base station lithium battery requirements

Overview

Integrating lithium batteries into existing 5G base station power systems may require some modifications. Operators need to ensure that the battery's voltage, capacity, and charging characteristics are compatible with the base station's power management system. What are the requirements for portable lithium ion storage batteries (mobile batteries)?

From February 1st, 2019, portable lithium ion storage batteries (mobile battery) with a density of 400Wh/L or above, must have a round PSE mark on the product, and meet the other table. Nine or other standard requirements of J62133 (H28) (JISC8712 (2015) or IEC62133 (2012) integration) Official website announcement.

What are the standards for lithium-ion batteries?

The standards for lithium-ion batteries are UL 1642. It is a standard usually used for testing lithium batteries. As lithium batteries continue to gain popularity in electric cars and portable electronics, so there is a need for a method for evaluating their quality.

Why should you buy a lithium Network Power Battery?

Leoch manufactures a wide range of Lithium Network Power Batteries to cover any telecommunications requirement. Aiming to deliver an unprecedented value to your needs, these solutions offer exceptional performance, long life, high energy density, ease of installation, and hassle-free operation for a broad spectrum of telecom applications.
