

# **Battery Cabinet Thermal Protection Site Cabinet**

### **Overview**

What is a lithium-ion battery storage cabinet?

DENIOS presents its Energy Storage Cabinet specifically crafted for Lithiumlon batteries, ensuring secure containment and charging. These meticulously designed lithium-ion battery storage containers guarantee comprehensive safeguarding, including 90-minute fire resistance against external sources.

Are lithium battery storage cabinets fireproof?

Constructed from powder-coated sheet steel, they incorporate a tested, liquid-tight spill sump to manage battery leaks that may catch fire. These fireproof lithium battery storage cabinets also feature self-closing doors and high-quality oil-damped door closers, further enhancing safety measures.

Are lithium-ion charging cabinets safe?

The highest fire risk occurs during charging. Adhering to basic safety rules is crucial. Asecos provides two reliable lithium-ion charging cabinets to fit your specific needs. Both options offer exceptional fire protection and safety features, ensuring secure storage and battery charging.

Where can I find the perfect lithium-ion battery storage container?

Let the team at Denios help you find the perfect lithium-ion battery storage container. Our website offers state-of-the-art lithium-ion cabinets with fireproof battery storage, providing peace of mind and protection for your energy storage needs.

Can a battery be stored outside?

According to insurers and associations, batteries of medium capacity must spatially or structurally (in a fire-resistant manner) be separated from other areas. Spatial separation by storing the defective batteries outdoors is only possible if a safety distance of 10 m surrounds the site.
