Highvoltage Battery

Overview

How many mw subsidized battery storage in Greece?

Home » News » Renewables » Greece awards 188.9 MW for subsidized battery storage in final auction Greece's third energy storage auction has been completed, with nine projects selected and a capacity of 188.9 MW.

What is Greece's first battery energy storage auction?

Greece has released its first battery energy storage auction for 400 MW. This is the first competitive process for energy storage in Southeastern Europe. Two more rounds are expected in 2023. The Greek Regulatory Authority for Waste, Energy and Water (RAWEW) has published the country's first round of battery storage auctions.

How to participate in a battery storage auction in Greece?

In order to participate in the auction, developers must submit: Beyond the 100 MW limit per project, the RAWEW requires: Greece has planned two additional battery storage auctions for this year. They will be held in third and fourth quarter of 2023. Each one will have a capacity equal to 300 MW.

How many battery storage auctions will Greece have in 2023?

Beyond the 100 MW limit per project, the RAWEW requires: Greece has planned two additional battery storage auctions for this year. They will be held in third and fourth quarter of 2023. Each one will have a capacity equal to 300 MW. This will bring the annual auctioned capacity to a total of 1 GW.

What is the future of battery storage in Greece?

Overall, following last months public consultation, the Greek ministry of the environment and energy presented a bolder and even more ambitious battery storage program, allowing for longer completion times but retaining the financial and competition guarantees in place.

How long does it take to get a battery system in Greece?

Battery systems sought for the islands that link to Greece's mainland electricity system (e.g. Crete) also have 150 days to apply for the new program. Projects larger than 10 MW need to apply for a grid connection agreement to the transmission network operator, while projects up to 10 MW need to apply to the distributor grid operator.
