

# **Belgian Communications BESS Power Station Production**

### **Overview**

Is ENGIE generating a Bess project in Belgium?

ENGIE is also generating two other BESS projects in Belgium which already have credentials in place, a 100-MW/400-MWh scheme in Kallo and an 80-MW/320-MWh battery in Drogenbos. The firm targets 10 GW of battery capability globally by 2030. At the end of 2023, it contained 1.3 GW of battery capacity in function and 3.6 GW secured under development.

Which ENGIE projects are advancing in Belgium?

ENGIE is also advancing two other BESS projects in Belgium, located in Kallo (100 MW / 400 MWh) and Drogenbos (80 MW / 320 MWh), for which permits have already been obtained. BESS Vilvoorde is a testament to ENGIE's commitment to developing large-scale flexibility solutions, crucial for the integration of renewable energy.

What does Bess stand for?

French electric utility ENGIE SA has undertaken construction of a 200-MW/800-MWh battery energy storage system (BESS) at its Vilvoorde site on the outskirts of Brussels in Belgium.

What is Bess payback mechanism?

Payback mechanism in case of DA above a fixed ceiling price. For BESS, CRM represent between 10 to 20% of the revenue. Complex process, complex rules and additional liabilities can frighten BESS developers. Exemption for 10 years of 100% of variable grid cost fee. Only FTM, BTM not exempted.
