

Belgian energy storage lithium battery pack customization

Overview

Can Lithium Werks make a custom battery pack?

Lithium Werks' patented Nanophosphate® battery technology (designed by MIT and A123) can be used in your custom modules. We can design and manufacture custom battery packs using lithium iron phosphate (LFP) cells for your power or energy application. Robust cylindrical, prismatic, or pouch cells can be produced for your pack.

What is the largest battery storage project in Belgium?

Construction has started on what will be the largest battery storage project in Belgium at 25MW/100MWh when completed later this year. Nala Renewables' lithium-ion battery energy storage system (BESS) will come online at metals conglomerate Nyrstar's zinc smelting operation in Balen, in Belgium's Flemish region, by the end of 2022.

Can Lithium Werks provide a battery management system (BMS)?

Lithium Werks can provide modules and packs with BMS (Battery Management Systems) to monitor, control and communicate with your devices or configure the modules to accept off-the-shelf BMS products. Lithium Werks builds custom battery packs and modules using lithium iron phosphate LFP batteries.

What makes Lithium Werks unique?

Lithium Werks has a unique set of integrated capabilities in high-performance LFP solutions leveraging its strong IP, design & engineering skills and 20+ years of manufacturing experience. Lithium Werks' patented Nanophosphate® battery technology (designed by MIT and A123) can be used in your custom modules.

Where can Lithium Werks help?

With global offices and fulfillment centers in North America and Europe and

engineering teams in America and Asia, Lithium Werks is able to provide rapid response to your specific requirements.
