

Belgian rooftop photovoltaic panel general contracting

Overview

Can you install solar panels on a roof in Belgium?

Installing solar panels on your roof is a (very) cost-effective operation. In Belgium, there are a number of subsidies to help cover the cost of installing solar panels. You can also choose the model of the self-consumption of energy produced by panels, which is also very advantageous.

How many solar panel installers are there in Belgium?

Belgian solar panel installers – showing companies in Belgium that undertake solar panel installation, including rooftop and standalone solar systems. 684 installers based in Belgium are listed below.

How does Belgium support solar panels?

Belgium encourages the use of solar energy by offering various forms of financial support. This support makes the installation of solar panels more affordable for many people. Each Belgian region (Flanders, Wallonia and Brussels) offers money to help pay for the installation of solar panels. The amount varies depending on where you live.

Are solar panels self-consumption a good idea in Belgium?

In Belgium, many people are opting for self-consumption for their solar panels. Here's what it means and what the advantages are: You use the electricity generated by your panels directly. If you produce too much, you can sell the surplus to the electricity grid. The upside of self-consumption:

Are banks ready to finance photovoltaic projects?

Today's banks are ready to finance photovoltaic projects thanks to their longstanding proven profitability. Concrete participation in the energy transitionGiven that the lifespan of an installation is between 25 and 30 years, that's as many years of carbon-free energy production. A real boost for the climate.

How many MWp does 7C solarparken have in Belgium?

The company has established a portfolio that includes 42 MWP capacity in Belgium, showcasing its ability to execute projects effectively. Their operations are supported by a strong foundation of expertise gained from their parent company, 7C Solarparken AG, which has a broader portfolio of 420 MWP across Europe.
