

Belgian smart energy storage battery prices

Overview

The price of a high-performance lithium battery system starts at around €2,500 for 5 kWh, including installation. For an average family, a requirement of 7 to 10 kWh is common, bringing the initial investment to between 3500€ and 5000€.What is a battery energy storage system (BESS)?

Similar to last year, battery energy storage systems (BESS) made up almost all new-build capacity selected in recent Capacity Remuneration Mechanism (CRM) auctions in Belgium.

How many energy storage projects are there in Belgium?

A quick look at the European Energy Storage Inventory public database hosted by the European Commission (EC) JRC Smart Electricity Systems initiative using data from Wood Mackenzie highlights 21 operational energy storage projects in the Netherlands and only 12 in Belgium.

Why is Belgium a good place to invest in a battery?

Other factors that make Belgium an appealing location for battery investments are the exemption of TSO grid fees and high revenues from balancing market (mainly FCR and aFRR)," Simon De Clercq, senior research associate at Aurora Energy Research, told ESS News.

Is Belgium ripe for battery storage development?

Belgium and its neighbour, the Netherlands, have been talked about by industry and analysts as being ripe for battery storage development.

What are the key market trends for battery storage?

It covers key market trends, with a particular focus on the shift toward utilityscale storage, the continuing growth of residential and commercial installations, and the evolving role of battery storage in supporting Europe's clean energy goals.

How did the energy crisis affect Belgian nuclear power?

"In 2022, the energy crisis led to a partial reversal of the Belgian nuclear phase-out. The lifetimes of the nuclear reactors of Doel 4 and Tihange 3, with a total capacity of 2.1 GW, were extended until 2035. This reduced the need for additional capacity in the Belgian power system.
