

Benin outdoor wind power base station enterprise ranking

Overview

How much energy does Benin use?

Benin imports a lot of its electricity, estimated at 1088 GWh in 2016 (CIA, 2016) . Its own energy production for that same year was around 335 GWh, showing its high dependence on imported energy.

Is Benin energy dependent?

In 2015, Benin was energy and electrically dependent at 41.3% and 76%, respectively, which worsened given energy imports at 1319.45 GWh in 2018 relative to 1202.15 GWh in 2017, an 8.07% increase due to a 76.80% drop in national electricity production in this period.

Is Benin an energy importer?

Fig. 8 shows that Benin is an energy importer, and very vulnerable in terms of its electricity supplies. Since 1990, between 75% and 99% of its electricity supply was imported, and imports grew sharply from 2007 to 2013, given exponential demand and little national production.

Is Benin a good country for energy use?

Benin is an agricultural country with rudimentary means of production. Despite the deplorable state of its agricultural development, this sector is still the main exporting sector in Benin. This confirms that Benin has considerable agricultural and domestic waste potential for energy use .

How much energy does biogas generate in Benin?

A study by the literature , on energy generation from biogas in Benin, considered ten municipalities, and showed energy gains at 24.1 GWh/year for the country, with estimated annual benefits at 3 million dollars.

How many hydropower plants are there in Benin?

The Ouémé River, the largest river in Benin, was estimated to be able to house around ten hydropower plants with power ratings ranging between 10 MW and 160 MW.
