

Bhutan energy storage power supply price

Overview

The Bhutan Electricity Authority (BEA) has determined an average cost of supply of Nu 0.23/kWh for Wheeling, Nu 2.501/kWh for High Voltage, Nu 3.71 /kWh for Medium Voltage and Nu 4.85/kWh for Low Voltage consumers for the period from 1st September 2022 to 30th June 2025. What is Bhutan's energy supply?

Bhutan's energy supply primarily relies on electricity, fuel-wood, coal, and diesel. Electricity is the largest contributor, with a shift towards increased usage over the years. Fuel-wood usage has decreased, while bio-gas, solar energy, and limited-scale wind energy have gained traction as alternative sources.

How much solar power does Bhutan have?

Solar Energy According to the Renewable Energy Resource Assessment 2015, Bhutan has a theoretical potential of 3,706,328 MW for solar photovoltaic power generation based on solar irradiance.

How much power does Bhutan use?

The majority of this capacity is derived from hydropower plants, accounting for 2,334.1 MW, including 8.1 MW from other embedded-hydro sources. In addition to hydropower, the country relies on diesel generators owned by Bhutan Power Corporation (BPC), contributing 8.93 MW to the overall capacity.

What is the energy consumption pattern in Bhutan?

Indeed, the current energy consumption pattern in Bhutan highlights a significant share of electricity in the fuel mix as the primary energy source, indicating a shift from traditional fossil fuels such as coal, diesel, and biomass.

Which industries consume the most electricity in Bhutan?

Electricity is the primary fuel input in Bhutan's Industry Sector, with the ferroalloys, steel, and cement-based industries as the major consumers. In contrast, other industries such as sawmills, briquetting, packaging, polyproducts, wire, and marble account for less than 0.5 percent of the total electricity consumption (i.e., 6.6 GWh per year).

How much electricity does Bhutan use in 2022?

During the year 2022, BPC serviced 232,465 customers, an increase of 4.7 percent from the previous year (BPC, 2023). The Building Sector in Bhutan consumed a total of 502.44 GWh of electricity in 2022, accounting for 14.5 percent of the country's total electricity consumption (3,465.95 GWh).

Bhutan energy storage power supply price

Assessment of solar energy generation potential in Western Bhutan ...

To address the growing electricity demand in the country, solar energy can be a diversification of Bhutan's renewable energy to address domestic energy security and global ...
