

Brunei installs double-glass photovoltaic panels

Overview

What is a double glass (Dual Glass) solar panel?

A double glass (Dual Glass) solar panel is a glass-glass module structure where a glass layer is used on the back of the modules instead of the traditional polymer backsheet. Double glass solar panels were originally heavy and expensive, but the lighter polymer backing panels gained most of the market share.

What are the benefits of double glazed solar panels?

Double-glazed solar panels, also known as dual glass solar panels, offer increased reliability, especially for large-scale photovoltaic projects. They provide better resistance to higher temperatures, humidity, and UV conditions and have better mechanical stability, which reduces the risk of microcracks during installation and operation.

What are the different types of Photovoltaic Glass Technologies?

To meet specific requirements, we offer two advanced photovoltaic (PV) glass technologies: amorphous silicon and crystalline silicon, both fully customizable. Our glass can be customized to block the heat that enters the building and to provide the best insulation, thus avoiding the use of air conditioning and heating.

Why is BPC partnering with Brunei?

The project also allows BPC to develop in-house expertise on the implementation of Solar PV technology, which will provide a foundation for BPC's further involvement in larger scale solar (LSS) PV projects within Brunei.

What is Photovoltaic Glass?

Our photovoltaic glass offers a cutting-edge solution for both new construction and renovation projects. When integrated into ventilated façades, this glass

enhances building aesthetics while providing key benefits such as radiation protection, thermal and acoustic insulation, and improved occupant comfort.

How long does a multi-busbar solar panel last?

Multi-Busbar (MBB) solar panels, as produced by manufacturers like AKCOME, Jinergy, and ZnShine, come with extended warranties of up to 12 years or even 15 years due to their durability. The length of the warranty for a Multi-Busbar solar panel is 12 or 15 years.

Brunei installs double-glass photovoltaic panels

Brunei double glass module processing factory

Recently several double-glass (also called glass-glass or dual-glass modules) c-Si PV modules have been launched on the market, many of them by major PV manufacturers.
