

Buying a solar inverter

Overview

How to choose a solar inverter?

Therefore, it is crucial to choose an inverter with excellent performance and reliable quality. Solar inverters can be mainly categorized into three main types: grid-tied inverters, off-grid inverters and hybrid inverters according to the grid connection status. 1. Grid-tied inverter.

How much does a solar inverter cost?

Price range: Typically between \$1,000 and \$5,000, depending largely on the power rating and features of the inverter. Characteristics: Suitable for large solar power systems, usually used for commercial and large industrial projects. String Inverter Price range: around US\$500 to US\$2,500, depending on power and brand.

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

Do you need a solar inverter?

Solar inverters are a necessary but often forgotten part of a home solar panel system since they convert sunlight into usable electricity for your home appliances. Without a solar inverter, you wouldn't be able to use those solar panels to power your home.

What is a solar inverter?

Solar inverters are the heart of any solar energy system, converting the direct current (DC) electricity generated by solar panels into alternating current (AC) power for homes, businesses, or utility grids.

Can I add solar panels later with a microinverter?

While it's easier to add solar panels to your system later with microinverters, choosing the right string inverter before your installation is critical, as central inverter systems are typically built-to-suit without the capacity for expanded solar generation. Use our online tool to find the right sizes for your solar energy system components.
