

Canadian outdoor communication battery cabinet export risks

Overview

How does Transport Canada handle lithium batteries?

Transport Canada regulates the safe handling, offering for transport, transporting and importing of lithium batteries by specifying classification, documentation, labelling, packaging and training requirements. All designs and types of lithium batteries must meet the requirements of the UN Manual of Tests and Criteria to be shipped safely.

What risks are facing Canadian exporters & investors?

In this report, EDC explores the main risks facing Canadian exporters and investors, including Brexit, a global recession and U.S. isolationism. The first risk—America First—is the most serious threat to Canada's long-term prosperity, especially if the United States continues to challenge multilateral institutions and trade agreements.

What are the risks facing exporters?

Here are the three main categories of risks facing exporters and how to manage these risks. 1. Economic and financial risks Economic and financial risks are those that affect your cash flow, profits or company viability, for example:.

Why is exporting a risky business?

The risk when exporting is also higher because it's harder to resolve issues in another country due to distance, different justice systems, language barriers and the like. This is problematic, because a single unpaid invoice can mean the difference between profit and loss. How to avoid economic and financial risks?

•

What are the TDG regulations for importing lithium batteries?

Please refer to Part 11 of the TDG Regulations for requirements related to marine transport. When importing lithium batteries, you must comply with the TDG Regulations. The TDG Regulations specify requirements for classification, documentation, labelling, packaging and training.

Where can I get a copy of Transport Canada's EC?

Contact the CBA at tdg@canadianbatteryassocation.ca for a copy of Transport Canada's EC or to enrol in the CBA's TDG online training programs. In addition to TDG, Environment Canada and each province have requirements for the shipment of waste lead batteries because they are considered hazardous waste.
