

China Communications has 2MWH320 000 5G base stations

Overview

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

How big is China's 5G network?

The Chinese mainland currently has 1.425 million installed 5G base stations that support more than 500 million 5G users nationwide, which makes it "the biggest network [of its kind] in the world", MIIT minister Xiao Yaqing said on Tuesday in a press briefing on the sidelines of the annual "two sessions".

Where is China Telecom 5G base station located?

Technicians of mobile network operator China Telecom set up a 5G base station near the Yellow River in Lanzhou, capital of northwestern Gansu province, on May 16, 2019. Photo: Reuters.

Does China have a 5G network?

Network operators China Mobile, China Unicom and China Telecom launched their commercial 5G services on the mainland in 2019. While China's 5G mobile network is already the world's biggest, MIIT head Xiao Yaqing said the existing number of base stations 'is not enough'.

Will China maintain its leadership in 5G?

He indicated that China will strive to maintain its leadership in 5G, while planning and laying the foundation for research and development on 6G technology. Technicians of mobile network operator China Telecom set up a 5G base station near the Yellow River in Lanzhou, capital of northwestern Gansu province, on May 16, 2019.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.
