

Comparison of China s 5G base station numbers and communications

Overview

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

How many 5G phone subscriptions are there in China?

China's 5G mobile phone subscriptions surpassed 1 billion by the end of November, local press reported, citing data released by the Ministry of Industry and Information Technology. The 5G subscriptions now represent 56% of all mobile lines in China, reflecting a 9.4 percentage point increase compared to the previous year.

Will 5G improve public services?

Official numbers for the US suggest that the US built 100,000 base stations between the years 2019 and 2021 and while Americans are looking at 5G to stream videos better and play games on their increasingly powerful smartphones, China is looking to deploy the technology for improved delivery of public services.

How many 5G stations are there in India?

The country now hosts 22.6 5G stations for every 10,000 residents, CGTN reported. The 5G mobile networks offer twice as fast data download speeds as its predecessor 4G connections and improved traffic capacity while reducing latency.

Does China have a role in 5G?

China also claims that it has contributed to formulating global standards around 5G services and its expertise in the domain is evident in the 42

percent share of global patents awarded thus far. Ameya Paleja Ameya is a science writer based in Hyderabad, India.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.
