

# Containerized offshore power generation

#### **Overview**

What is containerized energy storage?

ABB's containerized energy storage solution is a complete, self-contained battery solution for a large-scale marine energy storage. The batteries and all control, interface, and auxiliary equipment are delivered in a single shipping container for simple installation on board any vessel. How does containerized energy storage work?

.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Who is offshoregen?

OFFSHOREGEN was formed by the Quantum Offshore Ltd management and design team. This brings together the knowledge and experience of the past 30 years designing and building a huge range of offshore and onshore generator packages and control systems.

Is shore power mandatory for containerships?

Shore power for containerships is mandatory from 2030 onwards as per FuelEU. The creation of shore power infrastructure remains difficult and takes a long time however. Mobile shore power solutions, with- or without a battery will ensure port authorities compliance to regulations.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized

generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

How do shore power and ships generators work?

At this point the shore power and ships generators are operating in parallel. Once operating in parallel, the ships diesel generators are slowly and automatically unloaded causing the ships electrical load to be transferred from the diesel generators to the shore power supply in a controlled manner.
