

Demand for energy storage containers surges

Overview

Why is storage demand increasing?

Storage demand continues to escalate, driven by the pressing need to decarbonise economies through renewable integration on the grid and by load increases from data centre demand, manufacturing and increased electrification.

What is the future of energy storage?

Renewable penetration and state policies supporting energy storage growth Grid-scale storage continues to dominate the US market, with ERCOT and CAISO making up nearly half of all grid-scale installations over the next five years.

What will energy storage be like in 2024?

In 2024, the global energy storage is set to add more than 100 gigawatt-hours of capacity for the first time. The uptick will be largely driven by the growth in China, which will once again be the largest energy storage market globally.

Is energy demand putting the electric grid under strain?

Surging energy demand is putting the electric grid under strain," said John Hensley, SVP of markets and policy analysis at ACP. "The energy storage market is responding to help keep the lights on and support this unprecedented growth in an affordable and reliable way.".

Which emerging markets will lead the storage industry in 2025?

In Latin America, momentum was built as storage deployments increased by 42%. In 2025, emerging markets for storage will be on the rise. Saudi Arabia will lead the charge, fuelled by its expansion of solar and wind generation.

Why are annual storage installations growing faster than wind and solar?

Annual storage installations are growing faster than wind and solar as the sector races to keep up with the growing need to balance renewables and support grid resiliency. The storage market is also supported by falling module costs and IRA tax incentives.

Demand for energy storage containers surges

Global Energy Storage Market Records Biggest Jump Yet

The global energy storage market almost tripled in 2023, the largest year-on-year gain on record, and that growth is expected to continue.
