

Double Glass Photovoltaic Module Company

Overview

What is a double glass (Dual Glass) solar panel?

A double glass (Dual Glass) solar panel is a glass-glass module structure where a glass layer is used on the back of the modules instead of the traditional polymer backsheet. Double glass solar panels were originally heavy and expensive, but the lighter polymer backing panels gained most of the market share.

What are the benefits of double glazed solar panels?

Double-glazed solar panels, also known as dual glass solar panels, offer increased reliability, especially for large-scale photovoltaic projects. They provide better resistance to higher temperatures, humidity, and UV conditions and have better mechanical stability, which reduces the risk of microcracks during installation and operation.

How many patents are there for double-glass solar modules?

We have an independent R&D team with 11-year solar modules R&D experience. We can adhere to the product innovation, to ensure the delivery of a new series of products every quarter. As of 2020, the team has developed 67 intellectual patents for our double-glass products.

What is a dual-glass module?

Dual-glass type modules (also called double glass or glass-glass) are made up of two glass surfaces, on the front and on the rear with a thickness of 2.0 mm each. Some manufacturers, in order to reduce the weight of the modules, have opted for a thickness of 1.6 mm. DualSun has chosen to stay with a thickness of 2.0 mm for reasons explained below.

What is a double glass module?

Double glass module: the front and back two pieces of glass + photovoltaic cells are compounded by encapsulation film. Traditional double glass module

package: EVA+EVA, EVA+POE, POE+POE. Jiaxing Fuying double glass module package: PVB+PVB.

What are the different types of photovoltaic modules?

Two types of photovoltaic module structures coexist: Glass-polymer film (also called glass-backsheet) type modules. They are made of glass on the front side and polymer film on the rear side.

Double Glass Photovoltaic Module Company

Double glass solar module, Maysun Solar

Their dual-glass structure ensures superior durability, extends system lifespan, and reduces maintenance costs. With glass-glass modules, you benefit not only from enhanced efficiency ...
