

East Africa New Energy Charging Station

Overview

Strategically located at SP's Kanombe Station, which serves a busy trucking route near Kigali's International Airport and the Free Trade Zone, the facility provides a critical piece of infrastructure that will ultimately allow fully-electric commercial vehicles to transport goods between East Africa's port cities of Mombasa and Dar es Salaam and Rwanda at an 80% cost-savings on both fuel and vehicle maintenance compared to existing fossil fuel transport.

East Africa New Energy Charging Station

Middle East and Africa NEV Charging Facilities Market

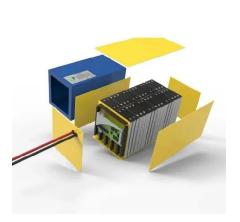

The growth of the Middle East and Africa NEV (New Energy Vehicle) charging facilities market is primarily driven by the escalating adoption of electric vehicles (EVs) in the ...
