Overview

What is Solarstone doing in Estonia?

Solarstone is reinforcing Estonia's commitment to sustainable energy solutions by opening Europe's largest solar roof factory to produce 14 times as many building-integrated solar roofs as Tesla in the U.S. The factory can assemble 13,000 integrated solar panels per month.

What is the largest power plant in Estonia?

The largest power complex in the country, Narva Power Plants, consists of the world's two largest oil shale -fired thermal power plants. The complex used to generate about 95% of total power production in Estonia in 2007. Falling to 86% in 2016 and 73% in 2018.

Will Estonia build a nuclear plant?

Preparations for a nuclear plant in Estonia have been ongoing since the summer of 2020 when then Environment Minister Rene Kokk put together a nuclear energy working group. One member of the latter is Fermi Energia that represents a group of entrepreneurs interested in constructing a small nuclear reactor in Estonia.

How many solar panels can a BIPV factory produce?

Estonian BIPV specialist Solarstone said this week that it has built a new 60 MW factory in Viljandi, Estonia. The site has the capacity to assemble 13,000 integrated solar panels per month, according to the company, enabling the supply of 6,000 homes with 10 kW solar roofs.

Who makes Solarstone solar panels?

The new factory is backed by investments from Estonian-based companies Sunly and Biofuel. The Solarstone product goes beyond a standard rooftop solar panel. Their building-integrated photovoltaics (BIPV) serve a dual purpose as both a roofing material and an energy generator, turning sunlight

into electricity.

Will evecon build a solar park?

In addition to the solar PV capacity, Evecon will build 26MW of battery energy storage systems at the project sites. The 77.5MW Kirikmäe solar park is owned by the Baltic Renewable Energy Platform (BREP), a joint venture set in 2022 between Evecon and Mirova.
