

# Ethiopian communication wind power base station manufacturer

#### **Overview**

The power station is owned by the national electricity utility company, (EEP). The station comprises 29 energy-generating wind mills, each rated at 3.45 megawatts capacity, for a total of 100 megawatts at maximum output. The generated energy will be integrated into Ethiopia's national electricity grid, through a substation to be built by the state-owned EEP, with a loan of US\$10 million, borrowed from the (AfDB). Assela Wind.

Does Siemens Gamesa have a wind power project in Ethiopia?

Siemens Gamesa has signed its first wind power project in Ethiopia with stateowned electricity company Ethiopian Electric Power (EEP),strengthening its leadership in Africa as the country begins to expand its green energy capacity to meet ambitious renewable targets.

Who owns Ethiopian Electric Power (EEP)?

The power station is owned by the national electricity utility company, Ethiopian Electric Power(EEP). The station comprises 29 energy-generating wind mills, each rated at 3.45 megawatts capacity, for a total of 100 megawatts at maximum output.

Where is Ethiopian power station located?

The power station is located near the town of Iteya, the capital of Oromia Region, approximately 140 kilometres (87 mi), southeast of Addis Ababa, the nation's capital city. Overview[edit] The power station is owned by the national electricity utility company, Ethiopian Electric Power(EEP).

Can Ethiopia be a power hub?

Ethiopia has many renewable resources covering wind, solar, geothermal, and biomass, and the country aspires to be a power hub and the battery for the Horn of Africa. The country's National Electrification Program, launched in 2017, outlines a plan to reach universal access by 2025 with the help of offgrid solutions for 35% of the population.

How much energy does Ethiopia need?

The country has set an ambitious target to supply 100% of its domestic energy demand through renewable energy by 2030. According to the African Development Bank, Ethiopia has abundant resources, particularly wind with a potential 10GWof installation capacity andhaving installed 324MW at present.

Is Siemens Gamesa a good partner for Ethiopia?

With more than 107GW installed worldwide; Siemens Gamesa is an ideal partner for Ethiopia at this critical juncture in the East African nation's accelerating energy journey. \*The order was signed in Q1 of fiscal year 2021.
