

Foreign investment in energy storage projects

Overview

Is CIF funding the next frontier in energy storage?

CIF is also fueling the next frontier in energy storage: \$70m in CIF funding is set to help kick-start a \$9 billion energy revolution in Brazil, which includes substantial investments in energy storage, such as pumped hydro and green hydrogen development.

Are energy storage technologies the key to reducing energy costs?

Energy storage technologies are also the key to lowering energy costs and integrating more renewable power into our grids, fast. If we can get this right, we can hold on to ever-rising quantities of renewable energy we are already harnessing – from our skies, our seas, and the earth itself. The gap to fill is very wide indeed.

Should storage projects be funded?

One large missing piece has been funding. Storage projects are risky investments: high costs, uncertain returns, and a limited track record. Only smart, large-scale, low-cost financing can lower those risks and clear the way for a clean future.

Are feoc restrictions relevant to large-scale energy storage projects?

Our focus here is on H.R. 1's extension and expansion of pre-existing foreign entity of concern (FEOC) restrictions for each of the tax credits most likely be relevant to large-scale energy storage projects under Sections 45Y, 48E, and 45X of the Internal Revenue Code.

How will HR 1 affect energy storage projects?

H.R. 1 significantly rolls back or repeals many of the clean energy tax credits and incentives introduced with the Inflation Reduction Act of 2022, but energy storage projects are generally not as severely impacted as wind and solar, as energy storage projects beginning construction before 2033 remain eligible for

How many new storage projects have been approved in the developing world?

Twelve new projects across the developing world have already been approved, including in Bangladesh, Brazil, Colombia, Haiti, Honduras, India, Indonesia, the Maldives, and Ukraine. In the next three years, CIF plans to create 1.8 GW of new storage capacity and integrate an additional 16 GW.
