

France fully supports new energy storage

Overview

France has taken a major step in expanding its energy storage capacity with the activation of a 100 MW/200 MWh battery energy storage system (BESS) at the port of Nantes-Saint-Nazaire. What is France's new lithium-ion energy storage system?

The new lithium-ion energy storage system in France will have a storage capacity of 25 megawatt hours (MWh) and output of 25 MW of power, making it the largest in the country. It will be used to provide fast reserve services to support the stability of the French power grid.

What is the largest battery-energy storage project in France?

Total has announced the largest battery-energy storage project in France - a 25 MWh/25 MW system to be installed later this year in Mardyck, at the Flandres Center, in Dunkirk's port district.

Does France have a natural gas storage facility?

France has a number of commercial natural gas storage facilities located across the country. There is no public or strategic natural gas storage in France and underground natural gas storage facilities are an essential tool for allowing operators to balance their systems and optimise their gas use.

What is Envision Energy's first independent battery energy storage contract in France?

After previous triumphs in Europe, this project represents Envision Energy's first independent battery energy storage contract in France. Envision Energy will provide a minimum of a 14-year long-term maintenance (LTSA) agreement, starting construction in June 2025, ensuring ongoing presence in the area once the construction phase is complete.

Is France a key market for Envision Energy?

Henry Peng, Senior Vice President and President of Latin America and

European Region, Envision Energy, stated: "France is a key market for Envision Energy as we expand our presence across Europe, and our partnership with Kallista Energy marks a significant milestone in this journey.

Why should you choose Envision Energy storage devices?

A flexible, resilient, and net-zero energy future is supported by Envision's energy storage devices, which are built with a strong emphasis on proven design, safety, and long-term dependability. These products are developed for secure and dependable performance throughout their lives.
