

German coal-to-electricity energy storage device manufacturer

Overview

Will ESS Tech become Germany's Green powerhouse?

U.S. energy storage technology manufacturer ESS Tech, Inc. and German energy provider LEAG cooperate to scale up iron-flow technology to provide long-duration energy storage as part of LEAG's strategy to become Germany's Green Powerhouse.

How efficient are Germany's pumped-storage power plants?

Efficiency is between 75 and 85%. Today, Germany has pumped- storage power plants producing a total of about 7,000 MW. The expansion potential is severely limited, especially in northern Germany where the balancing need is greatest.

How does a power plant work in Germany?

In any excess power supply, water is electrically pumped into a reservoir on a hill, so that it can be discharged when power demand is high to drive a turbine in the valley. Efficiency is between 75 and 85%. Today, Germany has pumped-storage power plants producing a total of about 7,000 MW.

How can leag become Germany's Green powerhouse?

"A key requirement for our transformation into Germany's Green Powerhouse is the deployment of cost-effective Long-Duration Energy Storage. We are energized to demonstrate the value of iron flow battery technology at scale," said Thorsten Kramer, CEO of LEAG.

Who is erdgasspeicher Kalle?

Erdgasspeicher Kalle GmbH, a company in the RWE Group, has great experience in the planning, building and operating of underground natural-gas storage facilities.
