

# Home energy storage system integrated products

# **Overview**

What is the mpsg-D series ESS all-in-one stackable energy storage system?

The MPSG-D Series ESS all-in-one stackable energy storage system is a highly efficient, modular, and integrated energy solution that meets the needs of both residential and commercial users.

What is a hybrid solar inverter & lithium battery storage system?

Seamlessly combining a hybrid solar inverter and lithium battery storage, it provides a reliable, scalable, and cost-effective way to harness the power of the sun. With its modular design, this stackable energy storage system is perfect for scalable applications, providing a flexible, efficient, and reliable energy management solution.

What is a liquid cooled battery energy storage system?

The system consists of: Ready to install liquid-cooled battery energy storage system with one (2-hour version) or two (4-hour version) battery cabinets, and a PCS cabinet. Liquid cooling provides two years longer battery service life and 15% higher discharge capacity, while maintaining less than 2.5 degree C delta between cells.

How does a solar energy storage system work?

Equipped with advanced monitoring and control features, this integrated energy storage system provides intelligent energy management that optimizes energy use based on real-time conditions. With reliable lithium batteries, it ensure that stored energy remains available during periods of low sunlight or grid outages.

Why should you choose a battery based energy storage system?

By sourcing batteries separately, users can expand their energy storage capacity as needed without overhauling the entire system. This scalability makes it an ideal solution for both residential and light commercial

applications, future-proofing investment and enabling smart energy management.

How many energy storage units can be connected together?

Stackable and lightweight, installers can effortlessly connect up to four units together for additional energy storage. Available in three sizes including 9 kWh, 13.5 kWh, and 18 kWh to meet an installation company's growing customer energy demands. Operating modes: back-up mode, self-use mode, time-of-use mode and custom modes
