

How many outdoor power supplies are there in Comoros

Overview

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Comoros on the IndexMundi Homepage and on this Comoros Data Portal.

How many people in the Comoros have access to electricity?

Just less than 70 per cent of the population of the Comoros has access to electricity: 61.4 per cent in rural areas and 85.1 per cent in urban areas (Table 3 and Figure 4). There are also access disparities between the three islands.

Which plants use the most energy in the Comoros?

Key consumption and production statistics are shown in Figures 2 and 3. Biomass (wood and charcoal) is used to provide about 70 per cent of energy use in the Comoros. Other plants being explored for generating biomass energy include oilseed plants, such as coconut, sesame, peanut and *Jatropha curcas* (REEEP, 2012).

How much energy does Grande Comore use?

The total installed capacity is 22.6 MW and the effective capacity is 13 MW. The monthly consumption on Grande Comore only is 3,782.7 KWh. These high costs make the possibility of switching or incorporating more renewable into the energy mix very attractive (Houmadi & Chaheire, 2015).

Does Grande Comore have a geothermal system?

high. The key indicator of a potentially exploitable geothermal system on Grande Comore is the presence of a rift system associated with the active volcano. This geological structure along with other measurements, including surface thermal discharges and a geophysical survey, suggest that an active geothermal system is present.

Will Gafo power the Grand Comore volcanoes?

If successful, Gafo will operate the power installations. Recent analysis by engineers from KenGen, the Kenyan national utility, indicate that both the

Karthala and La Grille volcanoes on Grand Comore have great geothermal potential, with reservoir temperatures taken at both sites of up to 300°C, at depths of 2,000 m and deeper (REEEP, 2012).

What is the electrification rate on Mohéli and Grande Comore?

For instance, the electrification rate on Grande Comore is 53.6 per cent , while on Mohéli it is 28.4 per cent and on Anjouan 22.6 per cent (REEEP, 2012). About a quarter of the population uses modern fuels, and of these, 10 per cent are in rural areas and 54 per cent in urban areas (World Bank, 2015); (World Bank, 2016).
