

How many photovoltaic inverters are there in Austria

Overview

Austria aims to achieve a 100% renewable electricity production by 2030 with 1,000,000 homes having solar panels fitted by that date. 11 TWh of extra photovoltaics will be needed above 2021 levels.

Who makes inverters in Austria?

The only inverter producer in Austria is Fronius International GmbH. Beside inverters, Fronius offers a wide spectrum of PV-Energy management solutions. SolOcean GmbH is a technology company and deals with the development and marketing of an innovative system for generating electrical energy using photovoltaics on water surfaces.

Who manufactures photovoltaic modules in Austria?

Currently 4 manufacturers of PV Modules are operational in Austria: Kioto Photovoltaics GmbH, Energetica-Photovoltaic industries, DAS Energy Ltd. as well as Ertex-Solartechnik GmbH; Sunplugged, as a start-up, develops flexible photovoltaic modules for integration into building envelopes, devices and vehicles.

What is the PV market like in Austria in 2022?

The Austrian PV market is still dominated by roof top installations, but 2022 for the first time a significant number of larger ground mounted PV systems were reported; nevertheless, more than 83,7% are still roof top, 1,3 % are building integrated (BIPV facade and roof) and 14,9% percent are ground mounted PV systems.

How many natural gas power plants are there in Austria?

There are currently 16 natural gas power plants in Austria and 3,4 GW power made by pump hydro storages powerplants. E-Control is the regulatory authority in Austria responsible for the electricity and gas industry. The TSO and the larger DSO's are mainly owned by the federal od regional governments.

What is the PV power systems market?

The PV power systems market is defined as the market of all nationally installed (terrestrial) PV applications with a PV capacity of 40 W or more. A PV system consists of modules, inverters, batteries and all installation and control components for modules, inverters and batteries.

How much does a photovoltaic system cost in 2022?

The maximum prices for the tenders 2022 are set out in Section 4 (1) EAG-PV 2022, which are as follows: For newly constructed and expanded photovoltaic systems: 9.33 cents/kWh In the tendering round for photovoltaics, 145 bids with a submitted capacity of 417 MW were submitted, of which 131 bids with an output of 398 MW were awarded.
