

# How many plants are there in the Congo Brazzaville energy storage power station

### **Overview**

Why did Eni build two power plants in Congo Brazzaville?

Eni, the leading natural gas producer in Congo Brazzaville, constructed the two natural gas-fired power plants to reduce natural gas flaring and commercialize more of the associated natural gas produced at its oil fields.

Does Congo Brazzaville have hydropower?

Congo Brazzaville has significant hydropower potential, estimated at 3.9 GW, but only 5% of this power has been developed. Several hydropower projects are reportedly under consideration for development. The status of projects is unknown, and the projects appear to still be in early stages of development or deliberation (Table 3).13.

Which power stations are in the Republic of the Congo?

This article lists power stations in the Republic of the Congo . / 2.93472°S 16.12778°E / -2.93472; 16.12778 (Imboulou Hydroelectric Power Plant) / 3.89444°S 13.76444°E / -3.89444; 13.76444 (Moukoukoulou Hydroelectric Power Plant) / 4.30111°S 15.20667°E / -4.30111; 15.20667 (Djoue Hydroelectric Power Plant).

Does Congo Brazzaville use natural gas?

Congo Brazzaville has historically used all of the natural gas it produces for domestic consumption (Figure 2).8 A significant amount of Congo Brazzaville's natural gas that is produced is flared (or burned off) as a by-product of oil production or is reinjected into oil fields to aid crude oil recovery.

How many hydropower plants are there in Congo?

As of early 2024, the country had three hydropower plants. Congo Brazzaville has significant hydropower potential, estimated at 3.9 GW, but only 5% of this power has been developed. Several hydropower projects are reportedly under consideration for development.

What petroleum products does Congo Brazzaville export?

Congo Brazzaville imports and exports several different petroleum products. According to estimates of seaborne trade flows of petroleum products by Vortexa, Congo Brazzaville exported an average of about 8,000 b/d of petroleum products from 2020 to 2023, primarily naphtha, liquefied petroleum gases (LPG), and fuel oil.
