making optimal refrigeration effect;

Overview

As of 10 January, 69 substations of Ukrenergo, Ukraine's national power supply company, have been equipped with the second level of protection, with work ongoing at another 13 substations. Source: Ukraine's Prime Minister Denys Shmyhal during a government Q&A session, as reported by Ukrinform

How many people are left without electricity in Ukraine?

Another power supplier, Yasno, says Ukrainians are likely to face power cuts until March. Already, some six million people have been left without electricity, according to Ukraine President Volodymyr Zelensky. To clarify, this means millions are without adequate heating, just as temperatures fall below zero in many parts of Ukraine.

How many power plants are in Ukraine?

Ukraine has 64 utility-scale power plants in operation, with a total capacity of 48569.8 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth.

Is Russia destroying Ukraine's energy infrastructure?

Russia has stepped up its bombardment of Ukraine's energy infrastructure. Here is a detailed and interactive map of the country's power stations. Ukraine's power supplies are being targeted by the Russian army, leaving much of the country with no heating throughout a cold winter. (Photo by Ed Ram/Getty Images).

Does Ukraine still have a nuclear power plant?

The Zaporizhzhia plant in southwest Ukraine, Europe's largest nuclear power plant, was occupied by Russian troops and hasn't supplied electricity since September 2022. However, a further three nuclear power plants with seven reactors between them remain operational in the east and south and continue to supply Ukraine with electricity.

How many power plants have been destroyed in Ukraine?

The extent of the destruction is enormous. “One year after the start of the war in February 2022, 76 percent of thermal power plants had been destroyed; now the figure is 95 percent,” says Ukrainian scientist Iryna Doronina. “And all the large hydroelectric power plants have also failed.”.

What happened to Ukraine's energy grid in November?

By 19 November, nearly half of the country's power grid was out of commission, and 10 million Ukrainians were without electricity, according to Ukrainian President Volodymyr Zelenskyy. By mid-December, Russia had fired more than 1,000 missiles and drones at Ukraine's energy grid.
