Overview

What are the components of a base station CB system?

Remember, the longer the CB antenna, the more potential range that you will have. The basic components for a Base Station CB System include a CB radio, power supply (if you are using a mobile CB radio instead of a base station CB radio), coax, and an antenna.

Which base station Radio will plug directly into my wall outlet?

We have selected the Galaxy DX2547 first, as this is the only base station radio that we offer that will plug directly into your wall outlet. You can choose to get a mobile CB radio, like the DX959B, but will require an additional power supply.

How much power does a CB radio have?

Keep in mind that, regardless of size, all CB radios have a power output of 4 watts as allowed by the FCC. If you select a radio without a built-in SWR meter, you will need an external SWR meter (you can select one in the accessories tab) to tune your antenna. Tuning your antenna is VERY important.

Should I choose a higher wattage PSU?

Choosing a PSU with a slightly higher wattage than your calculations initially suggest is a good practice. A higher wattage estimate provides a safety margin, ensuring your power supply can handle peak power demands, preventing issues like system instability, and leaving room for future upgrades.

How to calculate power supply wattage?

The power supply calculator will help you multiply the total amperage (amps) drawn by all components by the total voltage (volts) they need. The result will give you the total wattage your PC build needs to function properly. Use

Newegg's PSU wattage calculator to help you estimate the right wattage for your PSU.

How do I connect my mobile CB radio to my power supply?

The power supply is plugged into your wall outlet and your mobile CB radio will be connected to the power supply. This is generally cheaper than selecting the Galaxy DX2547 even though you would be purchasing two products (mobile CB radio and power supply) instead on one product, the DX2547. We have selected the DX959 and PS12 for this kit.
