

How much do photovoltaic panels cost in Liechtenstein

Overview

How much solar power does Liechtenstein produce a year?

Seasonal solar PV output for Latitude: 47.1322, Longitude: 9.5115 (Vaduz, Liechtenstein), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 5.71kWh/day in Summer.

Is Liechtenstein a good place to install solar power?

Vaduz, the capital city of Liechtenstein, is a suitable location for solar photovoltaic (PV) power generation with its latitude at 47.1322 and longitude at 9.5115. Throughout the four seasons, the average kilowatt-hours (kWh) produced per day for each kilowatt (kW) of installed solar capacity varies significantly.

How much solar energy does Vaduz produce a day?

In summer months, Vaduz experiences peak solar energy production with an average daily yield of 5.71 kWh/kW due to longer daylight hours and higher sun position in the sky. The energy production slightly drops in spring to an average daily output of 4.85 kWh/kW as sunlight duration decreases gradually.
