

How much does a Finnish solar power system cost

Overview

In Finland, the prices of solar panels have dropped significantly in recent years, which has made them an even more attractive option for households and companies. On average, the price of an installed solar panel system is around 1,200–1,800 euros per kilowatt (kW). Does Finland have solar power?

There is plenty of solar energy available in Finland, and solar power is predicted to be one of the lowest-cost electricity production methods in the coming years.

How many solar panels are installed in Finland?

Finland's production capacity is 16 000 m 2 /a. New installations were: 2 380 m 2 (2006), 1 668 m 2 (2005) and 1 141 m 2 (2004). There are growth opportunities in the solar heating. In 2018 S-Ryhmä decided to order solar panels for 40 of its commercial real estate buildings. This is the biggest solar panel project in Finnish history.

Why is Finland a good place to install solar panels?

"Finland's advantage is its low atmospheric temperature, which improves the efficiency of solar photovoltaic cells. The colder it gets, the better the solar panels work. Solar panels can also withstand snow loads if they are installed following directions.

How much solar energy will Finland produce by 2050?

LUT has modeled an emission-free energy system and demonstrated that the share of solar energy in Finnish energy production should rise to 10 percent by 2050. That would mean a leap from the current 635 megawatts to 35 000. The rooftop potential of all Finnish buildings (residential, administrative, industrial) is about 34 000 megawatts.

Can solar power improve the profitability of buildings in Finland?

LUT University has investigated how the profitability of solar electricity could

be improved in different types of buildings in Finland. Researchers have debunked myths related to the orientation and dimensioning of solar photovoltaic systems and sales of surplus electricity.

How much does a solar system cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar system costs.
