

How to connect the base station s built-in power supply

Overview

How do I install a base station CB system?

Base Station CB systems are not complicated to install, but there are a few things you should know. So, let's get into it. First, you need a radio system that works off of AC power. Most CB radios are designed for vehicles that are powered by DC 12-volt power systems.

Do base stations need a power supply?

Power Requirements: Base stations operate on 120V AC power rather than 12V DC, requiring either built-in power supplies or separate AC-to-DC converters. Size and Ergonomics: Designed for desktop use, these radios feature full-size controls, making operation more comfortable during extended sessions.

What are the components of a base station CB system?

Remember, the longer the CB antenna, the more potential range that you will have. The basic components for a Base Station CB System include a CB radio, power supply (if you are using a mobile CB radio instead of a base station CB radio), coax, and an antenna.

How do I set up a base station (fixed location) CB?

When setting up a base station (fixed location) CB, you have two basic choices of CBs: Base Station CB - A base station CB is a table-top model with a built-in power supply. Has a built-in power supply. Just plug it into an outlet. Usually feature-rich with plenty of cool knobs and switches. Easy to access the controls.

Can I use a mobile CB radio with a power supply?

To save on cost, you can use any mobile CB radio in your base station setup if you add a power supply to your system. A 5-amp power supply works great for powering a 12-volt CB radio. You can pair this power supply with any mobile

CB radio, including popular models such as the Cobra 29 LTD, President McKinley SSB, and the Galaxy 959 SSB.

Which base station Radio will plug directly into my wall outlet?

We have selected the Galaxy DX2547 first, as this is the only base station radio that we offer that will plug directly into your wall outlet. You can choose to get a mobile CB radio, like the DX959B, but will require an additional power supply.
