

Huawei Cape Verde solar panels

Overview

What is the largest solar power plant in Cape Verde?

Largest solar power plant in cape Verde on Sal Island was inaugurated by Cape Verde's Ministry of Energy and Commerce that will help the country to save energy. This is true given that Aguas de Ponta Preta developed a 5 MW solar plant in Santa Maria that is quite significant to the country's renewable energy plan.

Where will Cape Verde's Solar power plants be built?

The solar power plants will be built as part of Cape Verde's Renewable Energy and Improved Utility Performance Project and will be constructed on four different islands in the archipelago. Jonas Muthoni is an entrepreneur and renewable energy expert.

What will Cape Verde's new solar plant do?

The new solar plant will make Cape Verde one of the leading nations in the use of renewable energy within the region thus laying the foundation for what could be a more sustainable form of energy besides the traditional dependence on fossils. Read also Mtentu Bridge: Africa's Tallest and Longest Cantilever Bridge.

Why does Cape Verde need a solar project?

Project is located in Santa Maria on the island of Sal. This is why the completion of the solar installation also highlights Cape Verde's desire to strengthen its renewable energy capacity. Tourism is among the leading sectors in many countries, meaning that it is vital for energy consumption not to lead to carbon footprints.

How will the reiup project impact Cape Verde?

The REIUP project is expected to contribute significantly to achieving this target. In recent years, Cape Verde has made significant progress in

promoting renewable energy sources. The country has been investing in wind and solar energy projects, and in 2019, inaugurated the largest solar power plant in West Africa.

Can Cape Verde generate 50% of its electricity from renewable sources?

Cape Verde has set an ambitious target to generate 50% of its electricity from renewable sources by 2025. The REIUP project is expected to contribute significantly to achieving this target. In recent years, Cape Verde has made significant progress in promoting renewable energy sources.
